

ANILINOPYRIMIDINE DERIVATIVES AS JNK PATHWAY INHIBITORS AND
COMPOSITIONS AND METHODS RELATED THERETO

ABSTRACT OF THE DISCLOSURE

Compounds having activity as inhibitors of the JNK pathway are disclosed.
The compounds of this invention are anilino­pyrimidine derivatives having the following
structure:

wherein R₁ through R₆ are as defined herein. Such compounds have utility in the treatment of
a wide range of conditions that are responsive to inhibition of the JNK pathway. Thus,
methods of treating such conditions are also disclosed, as are pharmaceutical compositions
containing one or more compounds of the above compounds.
